

NEW

- Soft touch operation
- Cleaning cycle
- Improved pail

ZERO WASTE SYSTEMS

CS-25

smart cara

Treating food waste at the source and reducing by up to **90%**

the problem

Excessive logistical energy is required to send food waste to landfill. Plus it's an environmental hazard. The food waste decomposes without oxygen (anaerobically) to produce methane, a greenhouse gas with over 20 times the global warming capacity of carbon dioxide. Decomposing food waste is also a potential source of leachates, a liquid that drains from landfills that can contaminate surface and ground water.

the solution

Introducing Smart Cara, a state of art indoor food waste recycling composter for the home. Simply load the food waste in the removable basket and turn on. In as little as 3 hours, depending on moisture content, the system will dry and grind the kitchen scraps into a highly matured, nutrient-rich flake at around 10% of the original volume. This makes it an ideal additive for the garden or reduces your bin waste. There are no enzymes, pellets or additives required.

- No Methane Gas Release** (throughout the process)
- No More Kitchen Odours**
- No More Plastic Bags**
- No Water Needed**
- No Additives**
- No Draining**
- No Venting**

the benefits

- Deals with food waste at the source – reduces your handling costs.
- Breaks down food waste by drying then grinding the kitchen scraps into approx. 10% of the original size. Also has the ability to grind chicken bones and seafood shells.
- Turns waste food into a dry flake, nutrient-rich food for soil, a renewable source of energy or animal feed.
- Long storage capabilities without degradation.
- Strong environment credentials.

the features

- Approximate 3 hour QUIET process.
- 3 stages – Dehydration / Grinding / Cooling.
- Low Energy Use – 0.5-1kw depending on moisture content.
- No venting, draining or additives are required.
- Unique filters eliminate odour.
- Pail has a 1.5kg capacity and is dishwasher safe.
- Easy one-touch operation, soft touch panel.
- Improved cleaning cycle.
- Compact size 270(W) x 300(D) x 350mm(H).
- Smart Cara is Lightweight at 9kg.
